

MATHEMATICS INSTRUCTOR

Lioudmila Ismailova

"The important thing is not to stop questioning. Curiosity has its own reason for existing." -Albert Einstein

My name is Lioudmila (Mila) Ivanovna Ismailova. I have lived and worked in Turkmenistan, Russia, and I now live and teach in the United States. For me, teaching is a fulfilling experience, and I instruct so I can learn about the world and all those endless possibilities that brand new minds bring to me every day. I have had over 25 years of teaching experience and hold a BS in Economics from Turkmen Institute of the National Economy, an MS in Mathematics from Turkmen State University, and an MBA in International Business from Concordia University.

My main goal in teaching mathematics is to convince the students that the subject is not as hard as they think it is. I love teaching, and I like to do as much as I can for my pupils. As a teacher, I feel I have to provide an informative and interesting learning environment. It is the students' responsibility to achieve their maximum potential, but it is my responsibility to create the right atmosphere for that potential to be reached.

When I am not in school, I enjoy spending my time with my family: my husband Vladimir, my son Evgeny, my daughter Anastasia, and my two beloved grandkids, Halie and Nikolai. I love to listen to classical music, read historical novels, and arrange bouquets.
